

Study participation

Proportion of university students aged 25 years and over studying full-time has been increasing

Based on counts of persons who stated they attended a university/tertiary institution in each census year. Total count includes persons who did not state full-time or part-time student status.

- **Around half** of people studying in the higher education or training sector were aged 15–24 years
- **More females than males** were studying in the higher education or training sector in each of the five-year age groups
- **2.2** times more women than men aged 40–59 were studying

Non-school qualifications, 2016

54.5% of Queenslanders aged 15 years and over had a non-school qualification

Females in the younger age groups (15–34 years) were more likely than males to have non-school qualifications

Analysis excludes people who stated that they had a non-school qualification, but did not state the level of education obtained.

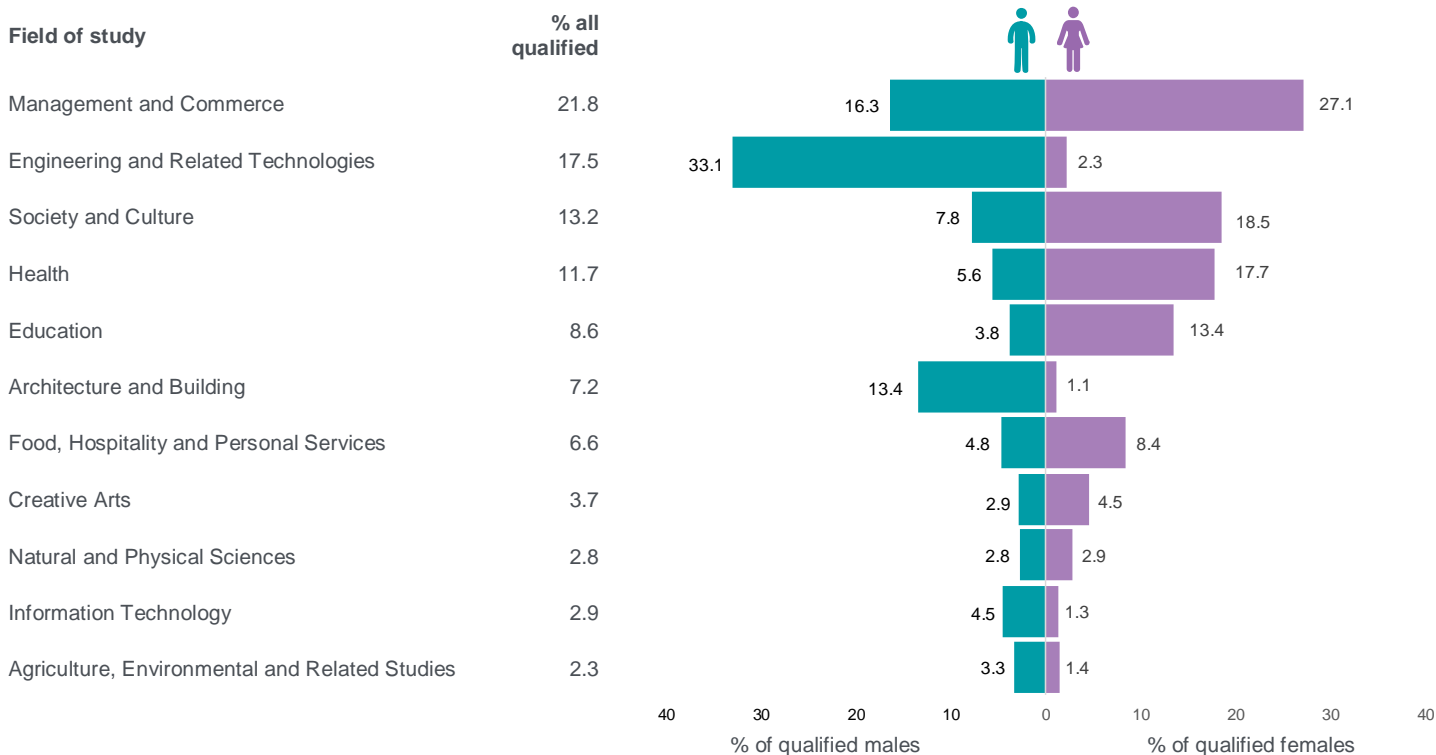

Highest non-school qualification, persons aged 20–64 years*

Analysis excludes those who did not state their level of education.

Highest non-school qualification—field of study, persons aged 20–64 years

Mixed field programmes and fields of study inadequately described not charted. 'Field of study not stated' excluded from analysis.

Notes

All figures are derived from place of usual residence.

Data applies to all Queensland adults aged 15 years and older, unless otherwise stated.

The higher education and training sector includes all university or tertiary institutions and technical or further educational institutions (e.g. TAFE).
