(a) Participation rate refers to the number of persons in the labour force expressed as a percentage of persons aged 15 years and over.

Main findings

Note: All data in this brief are based on 12-month moving averages of modelled estimates due to seasonal variation and noise associated with regional labour force modelled estimates. The modelled regional labour force estimates enhance the direct survey estimates of regional labour market data using administrative data and statistical modelling.

- Gold Coast SA4 had the largest annual growth in employment of all 19 SA4s during June 2026 with a growth of 5,700 employed persons (Figure 1).
- Mackay - Isaac - Whitsunday SA4 had the lowest unemployment rate of all 19 SA4s during June 2026 with an unemployment rate of 3.0% (Figure 2).
- All SA4s experienced an increase in their unemployment rate over the year to June 2026 with Wide Bay SA4 having the smallest increase of less than 0.1 of a percentage point (Table 1).
- Brisbane Inner City SA4 had the highest participation rate of all 19 SA4s during June 2026 with 76.3% and Wide Bay had the lowest participation rate with 53.6%.
